

Kyriba Open Reports Studio

Take Charge of Your Data with Automated, Real-time Reports

Kyriba Open Reports Studio is a powerful Excel add-in that seamlessly integrates with the Kyriba application via Kyriba APIs to empower finance professionals in treasury, accounting and other functions to take control of their data. With two-way data exchange between Kyriba and Excel, users can efficiently analyze, explore and visualize their selected data.

Highlighted Features

Reporting Add-In

- Available as downloadable add-in from Microsoft Office Store
- Leverage existing Excel formulas with Kyriba custom functions designed for treasury, accounting and other finance teams
- One add-in to connect to all Kyriba APIs: reports, imports, functions
- On-demand reports for advanced data-driven decision-making

Flexible & Cross-Platform

- Cross-platform support, for both Windows and Mac users
- Macros enable programming level flexibility for business users
- Custom build your own user interface, tailor-made for your daily operations and workflows

Easy to Use

- Log in with Kyriba application credentials
- Access real-time data with a single click
- Dedicated how-to guide available via Kyriba developer portal
- No coding required on the user's machine
