

Kyriba Trusted AI

Kyriba Trusted AI is a portfolio of AI solutions designed for CFOs and Treasury leaders to unlock new levels of liquidity performance and strategic agility. With Kyriba's agentic AI, TAI, and other embedded AI and machine learning capabilities, Kyriba Trusted AI empowers you to embrace the full potential of AI with the highest standards of data security, compliance, transparency, and user control.

Why Kyriba Trusted AI?

Kyriba Trusted AI offers a strategic advantage through operational excellence, predictive accuracy, and data security. Here's what makes it unique:

Uncompromised Security, Compliance, Transparency

- No training with customer data: Embedded Large Language Model (LLM) for Kyriba's agentic AI: TAI.
- Enterprise-grade security and privacy standards.
- Data Sovereignty and Transparency: Your data remains under your control.

Enabled by Kyriba's Trusted Platform Services

- Trusted Data: Rock solid data cloud foundation built on Amazon Web Services and Databricks.
- Trusted Connectivity: Connectivity-as-a-Service and API first to Banks, ERPs, 3rd party systems, and apps.
- Trusted Insights: Clear, actionable insights. No "black box".

Customer-Led, User-Centric Design

- Co-developed with Treasurers for treasury: Kyriba Trusted AI solutions are tailored to meet the practical needs of the office of CFO.
- Only accessible to authorized users and within their defined platform user rights.

"Trust is phenomenally important for us at this stage as a key pivot issue for AI adoption – being able to determine if the 'right' answer is a 'true' answer. Trust is critical right now in helping to build confidence."

Meaghan Downs
Sr. Analyst, Global Payment Solutions, Koch, Inc.

Key Capabilities and Functionalities

Built on a secure, scalable platform, Kyriba Trusted AI offers a portfolio of solutions to support CFOs and Treasurers in the most mission critical tasks with enhanced productivity and data-driven decision-making.

Agentic AI: TAI

TAI is purpose-built for treasury. It helps treasury teams gain cash visibility, business oversight, and turn liquidity decisions into action. By connecting insight, recommendation, and execution across Kyriba and partner platforms, it represents Kyriba's trusted approach to Agentic Finance, helping teams move faster, stay in control, and optimize their liquidity performance.

Cash AI

Kyriba Liquidity Planning Solution leverages AI to improve cash forecasting. Cash AI analyzes historical data, trends, and seasonality to predict future cash flows. Users can benchmark, create, and enhance forecasts by comparing them with AI predictions. AI-driven forecasts support both short and long-term planning, enabling better financial decisions.

Invoice AI

Kyriba Receivables Finance Solution embeds AI-powered invoice management to analyze both historical and real-time data to predict when buyers are likely to pay their invoices. The system improves its predictive power and accuracy over time as it learns and adapts by processing new data. Corporate and bank clients can use Invoice AI forecasts to optimize their financing programs.

Fraud Detection AI

The fraud detection engine in Kyriba Payments Hub employs AI to scan all payments in real-time to detect suspicious payments and isolate anomalies, using an adversarial model trained on the organization's payment history. Implemented with other payment controls and scenario analysis, Fraud Detection AI provides a powerful real-time detection mechanism against payment fraud.

Who Benefits from Kyriba Trusted AI?

Kyriba Trusted AI acts as a strategic partner for CFOs, Treasury leaders, and IT Solution Architects in both enterprise and mid-market businesses. [Contact us](#) today to get a demo.

CFOs

Leverage AI for improved liquidity management and strategic decisions.
